JavaScript, TypeScript, HTML, CSS, Java, C#, Python

Libraries & Frameworks

React, Angular, Tailwind CSS, Node.js, Prisma, Express.js, Sass, Material UI, Django

Tools

GitHub, Netlify, AWS, PostgreSQL, MySQL, AWS (S3, ELB, RDS, Amplify), CI/CD Tools, Version Control (Git)

Experience

Triton Public Awareness | Full-Stack Developer | 2021 - 2024 | Remote

- Designed and maintained REST APIs integrated with relational databases that align with business operations.
- Developed a responsive CMS to centralize operations and improve accessibility across multiple devices.
- Implemented tools to manage stakeholder information, inventory tracking, and delivery management, including forms, data visualization for tracking project progress, filters, and automation for instant data entry and processing.
- Integrated JWT authentication, request validation, and role-based authorization to enhance security and Redux for efficient state management across the application.
- Deployed the system to AWS, established a CI/CD pipeline for scalability, and implemented new features while troubleshooting issues.

WellEra | Front-End Developer | 2024 (Contract) | Saskatoon, SK

- Developed high-quality UI/UX designs using React and Material UI for interactive questionnaires, dashboards, and activity feeds within the WellEra product.

Emerald Executive Housing | Full-Stack Developer | 2023 (Contract) | Remote

- Developed an inventory system to track items across multiple rental properties, improving oversight and tracking losses.
- Improved online visibility with an interactive website designed to enhance online visibility and engage potential tenants.
- Integrated a customer inquiry tracking feature into the inventory app, allowing easy management and response to tenant questions.

Melcher Studios | Software Developer | 2017 (Contract) | Regina, SK

- Led the development of a Java application for Cross Borders Drilling, utilizing Swing for the user interface and SQLite for data storage, enabling efficient recording of drilled hole data.
- Contributed to C# game design projects within the Unity framework, enhancing interactive gameplay features.

Education
